Table 6 on p. 8 of Ref. 1 contains an error. The value for the critical-point pressure for “This work” should be 1.6796 MPa, not 1.665 MPa, and the value for the critical-point density should be 17.23 mol/l, not 17.6 mol/l, as it appeared in the published paper. The values appearing in the tables and figures were calculated using the correct critical-point properties.
